

SNEHIL BELEKAR

SENIOR TECHNICAL ARCHITECT — SECURITY ARCHITECTURE & COMPLIANCE CONTROLS

Brussels, Belgium
+32 492 344 350

belekarsnehil@gmail.com
linkedin.com/in/snehilbelekar

CORE COMPETENCIES

- Security Architecture & Governance
- Compliance Frameworks (ISO 27001, NIS2, ISO 27701, ISO 22301)
- Cloud Security (Azure, AWS, Kubernetes)
- DevSecOps, GitOps & IaC Automation
- Identity & Access Management (IAM, OIDC, RBAC, PAM)
- Security NFR Definition & Control Implementation
- Platform Governance & Security Review
- Risk Assessment & Threat Modelling
- Multi-Cloud Architecture & FinOps Optimization

TECHNICAL SKILLS

CLOUD	Azure, AWS, AKS, EKS, ACR, ECR, IoT Hub, Lambda, Cognito
SECURITY	Zero Trust, IAM, SNYK, Key Vault, RBAC, OIDC, PAM
DEVSECOPS	GitOps, Terraform, Helm, Jenkins, Maven, CI/CD
MONITORING	Prometheus, Grafana, Sentry
CONTAINERS	Kubernetes, Docker, Runtime Fabric
DEV	Java, HTML, Spring, Shell Scripting
TOOLS	JIRA, Confluence, Ansible, Cert Manager

PROFESSIONAL SUMMARY

Senior Technical Architect specializing in security architecture, compliance frameworks, and cloud governance. Expert at converting NIS2, ISO 27001, ISO 27701, ISO 22301, ISO 27005, and risk frameworks into engineering-ready technical controls and NFRs. Known for enabling product teams, guiding security champions, and ensuring consistent control adoption across complex platforms. Strong communicator who bridges the gap between compliance, engineering, and architecture to deliver secure, scalable, and resilient systems.

PROFESSIONAL EXPERIENCE

Technical Architect – Cloud & DC — Ypto Feb 2025 – Present | Brussels

- Defined and implemented security and compliance controls aligned with ISO 27001, ISO 27701, and NIS2 regulations.
- Translated compliance obligations into technical controls and NFRs for cloud and data-centre platforms.
- Led FinOps adoption and cost-optimisation strategies across cloud infrastructure.
- Delivered Microsoft Fabric and SAP BW integrations with Azure Cloud ecosystem.

Technical Architect / DevSecOps — Borealis Aug 2020 – Jul 2025 | Brussels

- Designed secure cloud platforms for the Digital Twin programme.
- Defined technical roadmaps and validated secure design patterns.
- Evangelized DevSecOps culture and developed reusable governance blueprints.
- Implemented MuleSoft Runtime Fabric with CI/CD, observability, and monitoring.
- Strengthened platform security posture via Zero-Trust architecture and SNYK compliance.

Technology Lead — Infosys Apr 2019 – Jul 2020 | Belgium

- Served as the CI/CD anchor for 34 enterprise applications across production environments.
- Automated release management and drove containerisation initiatives to modernize services.
- Coordinated cross-vendor delivery and production governance structures.

CERTIFICATIONS

- ♦ Infosys Certified DevOps Professional
- ♦ Certified System Architect (CSA)
- ♦ Infosys Java Certified Developer Cadre
- ♦ Business English Proficiency Certification

AWARDS

- ♦ Brilliant Award
- ♦ Insta Award

EDUCATION

B.Eng. in Electrical & Electronics Engineering

Barkatullah University Institute of Technology | 2006 – 2010

Infrastructure Analyst — Proximus

Apr 2015 – Mar 2019 | Belgium

- Upgraded 135+ Solaris servers and automated configuration management workflows.
- Implemented CI/CD workflows and AWS infrastructure with Docker and Kubernetes.
- Managed release, incident, and problem management processes.

Senior Software Lead — BT

Sep 2013 – Mar 2015 | UK

- Led requirement analysis and solution design for complex healthcare systems.
- Delivered reusable POC templates and mentored technical development teams.

System Developer / Trainee — Infosys

2010 – 2013 | India

- Developed financial remittance modules for large healthcare clients.
- Completed intensive training in Java enterprise ecosystems, OS fundamentals, and web applications.

Network Engineer — BSNL

2009 – 2010 | India

- Monitored network performance and effectively resolved LAN/WAN connectivity issues.
- Prepared technical proposals and implemented modernization recommendations.
