

# SNEHIL BELEKAR

SENIOR TECHNICAL ARCHITECT – SECURITY ARCHITECTURE & COMPLIANCE CONTROLS

Brussels, Belgium  
+32 478 841 486

belekarsnehil@gmail.com  
LinkedIn: Snehil Belek

## CORE COMPETENCIES

- Security Architecture
- Compliance Frameworks (ISO 27001, NIS2, ISO 27701, ISO 22301)
- Cloud Security – Azure, AWS, Kubernetes
- DevSecOps, GitOps & IaC
- IAM, OIDC, RBAC, PAM
- Security NFR Definition & Controls
- Platform Governance & Security Review
- Risk Assessment & Threat Modelling
- Multi-Cloud Architecture & FinOps

## TECHNICAL SKILLS

|            |                                                          |
|------------|----------------------------------------------------------|
| CLOUD      | Azure, AWS, AKS, EKS, ACR, ECR, IoT Hub, Lambda, Cognito |
| SECURITY   | Zero Trust, IAM, SNYK, Key Vault, RBAC, OIDC, PAM        |
| DEVSECOPS  | GitOps, Terraform, Helm, Jenkins, Maven, CI/CD           |
| MONITORING | Prometheus, Grafana, Sentry                              |
| CONTAINERS | Kubernetes, Docker, Runtime Fabric                       |
| DEV        | Java, HTML, Spring, Shell                                |
| TOOLS      | JIRA, Confluence, Ansible, Cert-Manager                  |

## CERTIFICATIONS

|                                        |
|----------------------------------------|
| Infosys Certified DevOps Professional  |
| Infosys Java Certified Developer Cadet |
| Certified System Architect (CSA)       |
| Business English Proficiency           |

## AWARDS

|               |
|---------------|
| 🏆 Bravo Award |
| 🏆 Insta Award |

## EDUCATION

B.Eng. Electrical & Electronics  
Barkatullah University Institute of Technology,  
Bhopal  
2006 – 2010

## PROFESSIONAL SUMMARY

Senior Technical Architect specialising in security architecture, compliance frameworks, and cloud governance. Expert at converting NIS2, ISO 27001, ISO 27701, ISO 22301, ISO 27005 and risk frameworks into engineering-ready technical controls and NFRs. Known for enabling product teams, guiding security champions, and ensuring consistent control adoption across complex platforms. Strong communicator who bridges compliance, engineering, and architecture to deliver secure, scalable, and resilient systems.

## PROFESSIONAL EXPERIENCE

**Ypto**  
*Technical Architect – Cloud & DC*

Feb 2025 – Present  
Brussels, Belgium

- Defined and implemented security and compliance controls aligned with ISO 27001, ISO 27701, NIS2.
- Translated compliance obligations into technical controls and NFRs for cloud and data-centre platforms.
- Led FinOps adoption and cost-optimisation strategies across cloud infrastructure.
- Delivered Microsoft Fabric and SAP BW integrations with Azure Cloud.

**Borealis**  
*Technical Architect / DevSecOps Specialist*

Aug 2020 – Jul 2025  
Mechelen & Brussels

- Designed secure cloud platforms for the Digital Twin programme.
- Evangelised DevSecOps culture and developed reusable governance blueprints.
- Defined technical roadmaps and validated secure design patterns.
- Implemented MuleSoft Runtime Fabric with CI/CD, observability, and monitoring.
- Strengthened platform security posture via Zero-Trust architecture and SNYK compliance.

**Infosys**  
*Technology Lead*

Apr 2019 – Jul 2020  
Brussels, Belgium

- CI/CD anchor for 34 enterprise applications across production environments.
- Automated release management and drove containerisation initiatives.
- Coordinated cross-vendor delivery and production governance.

**Proximus**  
*Infrastructure Analyst*

Apr 2015 – Mar 2019  
Brussels, Belgium

- Upgraded 135+ Solaris servers and automated configuration management workflows.
- Implemented CI/CD workflows and AWS infrastructure with Docker/Kubernetes.
- Managed release, incident, and problem management processes.

**BT**  
*Senior Software Lead*

Sep 2013 – Mar 2015  
Ipswich, UK

- Led requirement analysis and solution design for healthcare systems.
- Delivered reusable POC templates and mentored development teams.

**Infosys**  
*System Developer / Trainee*

2010 – 2013  
India

- Developed remittance modules for healthcare clients.
- Completed intensive training in Java, OS fundamentals, and web applications.

**BSNL**  
*Network Engineer*

2009 – 2010  
Indore, India

- Monitored network performance and resolved LAN/WAN issues.
- Prepared technical proposals and implemented modernisation recommendations.
